

In the United States Patent and Trademark Office

In re application of:

Inventors: MCGINNIS, Ralph Evan and  
MCGINNIS, Robert Owen

Title of the Invention: "Two-Dimensional Linkage Study Methods and Related Inventions."

U.S. Application No. 10/037718

Date of filing: 04 January 2002

Examiner Kenneth R. Horlick, Art Unit 1637

Patent application 10/037718 is a continuation-in-part of U.S. Patent Application 09/947,768 (filed 5 SEPT 2001), now abandoned. And 09/947,768 claims priority from US Provisional 60/230570 (filed 9/5/2000). Patent Application 09/947,768 is a continuation-in-part of U.S. Patent Application 09/623,068 (filed 26 AUG 2000). The present patent application is also a continuation-in-part of Patent Application 09/623,068 (filed 26 AUG 2000). Application 09/623,068 claims priority from PCT/US99/04376 filed (2/26/99). PCT/US99/04376 claims priority from US Provisional applications: 60/076182 filed 27Feb1998, 60/086947 filed 27May1998, 60/076102 filed 26 Feb 1998 and 60107673 filed 7 Nov 1998.

**Amended Information Disclosure Statement**

c/o Honorable Commissioner of Patents  
Alexandria, Va. 22313

Sir:

This submission is a supplemental or amended IDS. Attached hereto is an amended version Form PTO/SB/08B (3 sheets) listing documents believed relevant to the subject application. The form has been amended by eliminating the words "OTHER PRIOR ART" from the listing heading. This was done to signify that no reference in this amended IDS or previously filed original IDS (April 04, 2002) is admitted by the applicants to be prior art with respect to the invention by the reference's listing in the IDS. Form PTO/SB/08A (1 sheet) is also included. This sheet is unchanged from the original IDS.

Amended or Supplemental Information Disclosure Statement regarding U.S. Application No. 10/037718, Title of the Invention: Two-Dimensional Linkage Study Methods and Related Inventions. March 04, 2004 Atty's Docket No. 2DLSM&R12/01

2 of 3

In addition, four new references (labeled X, Y, Z, and AA) have been added at the end of the listing on sheet 3. It is respectfully requested that these new documents (labeled X, Y, Z, and AA) be considered by the examiner and an initialed copy of sheets 1-4, with initials next to the references (including those labeled X, Y, Z, and AA) be returned to the undersigned. Each of these references (labeled X, Y, Z, and AA) is a published abstract of a poster or a slide presentation. Reference X is an abstract of a poster session presented Oct 7 and 10, 1991; reference Y is an abstract of a poster session presented Oct. 7 and 8, 1993; reference Z is an abstract of a slide session presented Oct. 26, 1995; and reference AA is an abstract of a poster session presented Oct. 30, 1996. All of these abstracts were published before the actual presentations.

This disclosure statement should not be construed as a representation that a search has been made or that no other material information as defined in 37 C.F.R. 1.56 (a) or similar requirements exists.

It is believed that this disclosure complies with the requirements of 37 C.F.R. 1.56, 1.97, 1.98 and the M.P.E.P. 609 and similar requirements. If for some reason the examiner considers otherwise, it is respectfully requested that the undersigned be notified.

A copy of each document (labeled X, Y, Z, and AA) is enclosed. Some of the documents may have markings thereon. No significance is meant to be attached to the markings. These documents are not necessarily analogous art. Each of these documents (labeled X, Y, Z, and AA) is listed in the bibliography of the inventor's unpublished manuscript (submitted to the American Journal of Human Genetics, included with previous provisional priority documents and cited in the patent application) or the inventor's published paper that is incorporated by reference into the patent application (Annals of Human Genetics, 1998, 62: pp. 159 to 179; a copy of which was included with the original IDS).

A copy of each of documents A through W was previously enclosed with the original IDS or related applications. And the Examiner returned an initialed copy of the original IDS indicating that he had previously considered each of references A through W and each of patent documents 1 through 5 in the original IDS. A copy of patent document 5 was enclosed in the original IDS, a copy of patent documents 1 through 4 inclusive was not included with the original IDS as these references were essentially cumulative or were priority documents for the present application. Document 5 is not necessarily analogous art. These documents, documents A through AA inclusive, are not necessarily analogous art.

Document A is discussed in the background and specification of the patent application and is incorporated into the application by reference. Document B is discussed in the specification and incorporated by reference in the patent application. Documents C through I inclusive and documents O and P are discussed in the background of the patent application. Documents F, I, O, and P inclusive were listed by the examiner in the International Search Report for PCT/US99/04376. Document 5 was "made of record as a document of interest" by the U.S. examiner during the examination of US National Application 09/623068. The documents believed to be most relevant are A, D, E, F, M, Q, R, S, T, U and V.

Amended or Supplemental Information Disclosure Statement regarding U.S. Application No. 10/037718, Title of the Invention: Two-Dimensional Linkage Study Methods and Related Inventions. March 04, 2004 Atty's Docket No. 2DLSM&R12/01  
3 of 3

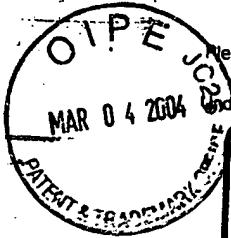

**Other Information:** A copy of the inventor's unpublished manuscript (submitted to the American Journal of Human Genetics, included with previous provisional priority documents and cited in the patent application) is enclosed.

Respectfully submitted,

Robert O. McGinnis, Coinventor and U.S. Patent Agent 44, 232  
Address for correspondence: 1575 West Kagy Blvd., Bozeman, Mt. 59715, phone 406-522-9355
